PROFESSIONAL EXPERIENCE

FDM Group | Toronto, ON, Canada

Project: POD LMS and TMS

Position: Java Developer Consultant

Period : Aug/2022—Jul/2023

- Designed UML diagrams for Classes attributes and methods, and their dependent connectivities, so that it helps 80–90 member of the team in understanding, modifying and maintaining the system.
- Developed and maintained front-end interactive web applications using Angular, HTML/CSS, JS and typescript.
- Proficiently built back-end of 2 main maven project's applications with MVC pattern using Java, Spring Boot, JPA, SQL and others.

- Received Appreciation from my all the teammates for my innovative ideas and work as a developer in 2023.
- Manually tested the units of code and mocked dependencies of those units which helped me in isolated and reliable testing.
- Tested APIs by sending requests to get the expected response in Postman.
- Agile solution design and development – participation on daily scrum, iteration planning, showcases and retrospectives.
- Ensuring that any changes to user access right are properly documented and tracked in the organisation's audit log or other system of record.
